(54) Title: MONITORING AND CONTROL OF FIELD ELECTRICAL POWER EQUIPMENT

(57) Abstract: A power facility (122) has at least one power element (120) and a system monitors/controls at least a portion of the power facility. In the system, a field drop (114) is coupled to each element for monitoring same, reporting status data, receiving control information, and controlling such element. A local area network (LAN) couples each field drop (114) to a hub, and a data server (102) is coupled to the hub. The data server (102) receives the status data from each field drop (114) and takes any appropriate action necessary in response thereto, and also allows a user to access any particular field drop (114) of the system to read data for the corresponding element and issue control commands for the element to be carried out by the corresponding field drop.

- *before the expiration of the time limit for amending the claims and to be republished in the event of receipt of amendments*

(88) Date of publication of the international search report:

16 October 2003

For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.

INTERNATIONAL SEARCH REPORT

International application No.

PCT/US02/40259

A. CLASSIFICATION OF SUBJECT MATTER

IPC(7) : G05D 11/00

US CL : 700/286, 293; 361/68; 713/320

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

U.S. : 700/286-298; 361/68; 713/320

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category *	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
Y	US 6,157,527 A (SPENCER e al.) 05 December 2000 (05.12.2000), Whole document.	1-25
Y	US 6,005,759 A (HART et al.) 21 December 1999 (21.12.1999), Whole document.	1-25

☐ Further documents are listed in the continuation of Box C.

☐ See patent family annex.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family

Date of the actual completion of the international search

04 August 2003 (04.08.2003)

Date of mailing of the international search report

22 AUG 2003
